

Dimax Data Convergence Module (DCM)

DCM operates in a thin server environment to provide a uniform operating platform for the control and monitoring of data accessed from disparate data sources.

DCM Features and Benefits

- ☐ *low cost, complete text and graphics user interface*
- ☐ *accessible using standard web browsers, no proprietary software required*
- ☐ *accepts concurrent data streams from multiple non-proprietary protocols*
- ☐ *supports multiple users over LAN, WAN and Internet*
- ☐ *compatible with various wireless PDA devices*
- ☐ *built in email notification and escalation tools*
- ☐ *where connected, accesses the Internet for reference data*
